- Video, Voice and Data
- Point-to Point / Multipoint
- Rural Broadband
- LTE (Long-Term Evolution)
- In-Building Wireless

Usage Models

- Video Surveillance / Analytics
- Asset Management – RFID
- Wireless LAN Security

Planning & Design Services

For over four decades, the VISLINK group of companies has been providing complete secure communications systems and solutions throughout the world.

Whatever your planning and design requirements: point-to-point, point-to-multipoint, backhaul, MESH, WIFI, WiMAX, LTE, network optical fiber, or structured cable solutions, VISLINK Services provides the most appropriate and reliable applications for secure video, voice, and data solutions.

Our professional organization includes experienced and certified engineers, technicians, as well as planning, design, integration, and installation experts compliant to OSHA requirements.

System Integration & Support Services

A complete line-up of design-build solutions from an industry leading system integrator. Our goal is to provide our customers with the highest level of professionalism and experience to exceed your design, integration, and operational expectations.

Our technical services team is comprised of professional engineers and technicians with diverse industry backgrounds. With years of "real world" field experience extending throughout the entire communication and RF spectrum, you can always expect professional, expertly-trained personnel dedicated to providing solutions to your unique communication challenges.
