

TRAINING

Overview

The Vislink Services provide real-world, hands-on training for our solutions, designed to empower customers with the knowledge of the technology as well as their system. Technical training classes feature a comprehensive product overview, detailed set-up and operating information and, most importantly, a hands-on component, allowing participants to become technically proficient with their system. Training is tailored to the customers' specific needs and includes installation and operation techniques, so your team can get the skills they need to successfully configure and manage your network. Classes can be held in our fully equipped facilities, or at your site using your equipment.

Features

- Hands-on, real-world training designed to provide technical proficiency
- Comprehensive product overview, detailed set-up and operating information
- Tailored to the customers' specific needs including installation and operation techniques
