Vislink Services Appoints Bob Flanders to Southeast Sales Team

ORANGE, CA and TAMPA, FL– December 8, 2009 – Vislink Services is pleased to announce the appointment of Mr. Bob Flanders to the Southeast Regional Sales Team. With over 30 years of extensive business development, sales and project management experience, Bob comes to us from NEC Corporation of America where he successfully established new accounts in the Southeastern US region, including Universal/Orlando, ISC (International Speedway Corp) and Ripley's Entertainment.

Mike Cessna, Vislink Services' Regional Operations Manager states, "We are very excited to have someone like Bob on the team as he understands the sales process for selling services and solutions. His technical competency and diversity in business development, sales and project management combined with solid business savvy is sure to add significant value to our team".

Bob is located in the Vislink Services' Tampa Florida office. He can be contacted at 813.242.8500 or via email at bflanders@vislinkservices.com

About VISLINK Services

VISLINK Services is the leading Professional Services organization within the Vislink Group. Positioned as a prominent global Total Solutions Integrator, Vislink Services specializes in the provision of Lifecycle Services including Infrastructure Planning, Engineering Design, Integration, Physical Deployment, Maintenance Support and Managed Services of Broadband solutions for both wired and wireless network solutions.

The Vislink Services team applies years of extensive knowledge and experience in the areas of terrestrial microwave, satellite, optical fiber, structured cable and associated secure communications systems, delivering a full spectrum of customer solutions across the Public and Private sectors. Our expertise spans the enterprise marketplace, small-medium businesses, and specific verticals such as Government, Public Safety, Utilities, Education, Healthcare, Asset Management, Transportation, Mining, Agriculture and Television Broadcast.

Vislink Services delivers the secure foundation for the wired and wireless network infrastructure; enables the wireless expansion and solution enhancement through complete engineering design and implementation; and fully integrates solutions for mobility and services for the entire network, allowing end-users to realize seamless broadband access and interoperability for connectivity to data, voice, video, and usage application models.
