Planning & Design Services

For over four decades, the VISLINK group of companies has been providing complete secure communications systems and solutions throughout the world.

Whatever your planning and design requirements: point-to-point, tactical, mobile, fixed site, area-wide, satellite, VISLINK Services provides the most appropriate and reliable applications for secure video, voice and data solutions.

Our professional organization includes experienced and certified engineers, technicians, as well as planning, design, integration and installation experts compliant to OSHA requirements.

System Integration & Support Services

A complete line-up of design-build solutions from an industry leading system integrator. Our goal is to provide our LEPS customers with the highest level of professionalism and experience to exceed your planning, design, technology procurement, integration and operational expectations.

Our technical services team is comprised of professional engineers and technicians with proven backgrounds in addressing critical law enforcement and public safety communications needs. With years of "real world" field experience extending throughout the entire communication and RF spectrum, you can always expect professional, expertly trained personnel dedicated to providing solutions to your unique communication challenges.
