

DESIGN

Overview

Vislink Services offers a full range of Design Services to help create and implement a proper solution for the challenges ahead. We evaluate your system needs and assign project engineers to create the system to fit your specific application. Whether you need a full system design, a new set of ENG portables, a 30 hop digital statewide bi-directional network, or mobile video downlink, Vislink Services has the power to get it done, right.

Through a proven delivery methodology, Vislink Services provides a highly experienced design team whose main purpose is to help discover, analyze and assess your overall IT and network communications challenges in order to help recommend the most appropriate solution. We can develop complete systems from the path profiles and site design through to the turnkey solution. Our staff of highly qualified and experienced engineers are empowered to implement our proven methodology of Design services. With decades of experience we help plan and design systems and solutions with the customers' current and future needs in mind.

Designing the most cost-effective and flexible network begins with targeted assessment of customers' business, service vision, operational environment and network reliability. Vislink Services Design services encompass all the essential functions necessary to ensure implementation of a cost-effective, flexible system infrastructure.

VISLINK
Services

Features

- Comprehensive and personalized design approach to create the system to fit your specific application
- Thorough Requirement Evaluation
- Tailored Solution Design
- Specification and Recommendation of Correct Technology Solution

Benefits

- Provides an objective, and comprehensive solution design based on data obtained from consultation, research, and situation analysis
- Enhances your organization's ability to deploy system and solutions expertise for strategic business advantage
- Provides a blueprint for implementation success, boosts performance, increases functionality, and avoids future problems
- Helps meet strategic objectives due to alignment with business goals, providing increased ability to scale, absorb change, and minimize TCO
- Provides a blueprint for action and improves utilization of capital investments
- Reduces risk, delays, and the total cost of network deployments with an implementation-ready design that you can use to engineer your network

Worldwide

Vislink Services customers are located around the world – but they all have one thing in common. There's no room for error. That's why it's vital that you have access to a team that can help Plan, Design, Integrate and Maintain your system. Not only that, but you need repairs and servicing to happen exactly how and when you expect.

Vislink Services caters to a your needs and budgets, and take care of every stage of your system's life – from pre-implementation planning and design services to integration and implementation, to training, maintenance, upgrades and field repairs. We want to be sure our customers have the most reliable solutions - and the most reliable support.

Available Services

- Complete System Planning and Design
- In-Building Wireless Services
- Distributed Antenna Systems
- Bi-Directional Amplifiers
- In-Factory System Integration
- On-Site System Installation
- System Commissioning & Performance Verification
- Training
- Maintenance and Operational Services

Delivered by Proven Performers

- Industry professionals with years of service and integration experience
- From design conception to system commissioning providing an end-to-end solution
- Providing specific custom services, or can manage your complete turnkey project
- Backed by the extensive staff with a forty year history in the industry

Vislink Services specializes in the design and installation of IT communications, video and data microwave communications, electronic news-gathering, airborne law enforcement, cellular and PCS, satellite, video surveillance, fiber optics and site control systems.
