Worldwide Presence

VISLINK Services' customers are located around the world – but they all have one thing in common - their communications network is the heart of their business -- maximum uptime is mission critical. That's why it's vital that you have access to a team that can help Plan, Design, Integrate and Maintain your system. VISLINK Services caters to your needs and budgets, and takes care of every stage of your system's life – from pre-implementation planning and design services to integration and implementation, to training, maintenance, upgrades and field repairs. We want to be absolutely sure our customers have the most reliable solutions - and the most reliable support.

Technology Solutions Enabling:

- Consulting, Planning, Design, Integration and Maintenance Services
- Managed Services and Operational Management Solutions
- Project Management
- Deployment Services
- Shop-to-Mine Site Equipment Control and Connectivity
- Remote Equipment Control
- Asset Management
- Mining Metrics and Analytics
- GPS Augmentation
- Video Surveillance and Analytics
- Proximity Analytics

Delivered by Proven Performance

- Industry professionals with decades of service, solution and integration experience
- From design conception to system commissioning providing an end-to-end solution
- Providing custom services or full turnkey projects with complete knowledge transfer and training support
- Backed by an extensive staff with decades of experience in industrial deployments

VISLINK Services specializes in the design and installation of IT communications, video and data microwave communications, electronic news-gathering, broadband wired and wireless solutions, mining and natural resources solutions, law enforcement and public safety solutions, marine and energy solutions, cellular and PCS, satellite, industrial networks, agriculture, transportation, video surveillance, fiber optics and site control systems.

Mining and Natural Resources Innovations

Delivering Optimized Communication Solutions for the Mining and Natural Resources Industry

VISLINK Services

Mining and Natural Resources Innovations

Delivering Effective Communication and Broadband Solutions for the Mining and Natural Resources Industry

At Vislink Services we are keenly aware of the unique challenges faced by the mining and natural resources marketplace. From resource allocation and procurement, to Information Technology and communication, Fleet Management Systems (FMS), High Precision GPS (HPGPS), asset management and ongoing operations management and everything in between, we understand that those challenges are not only constant but at times formidable. You are not alone.

As a Total Solutions Integrator, Vislink Services' comprehensive and solutions-based approach is specifically structured to discover, diagnose, design and deliver a comprehensive solution to uncover and address those unique challenges and needs, via our portfolio of Consulting, Planning, Design, Integration and Maintenance offerings.

Our goal: To provide you with a comprehensive solution that offers the Lowest Cost Per Ton (LCPT), a lower total cost of ownership (TCO), and a high and expedient return on investment (ROI).

VISLINK Services – Technologies and Solutions

- Video Surveillance and Analytics
- Proximity Analytics
- Asset Management – RFID
- Wireless LAN Security

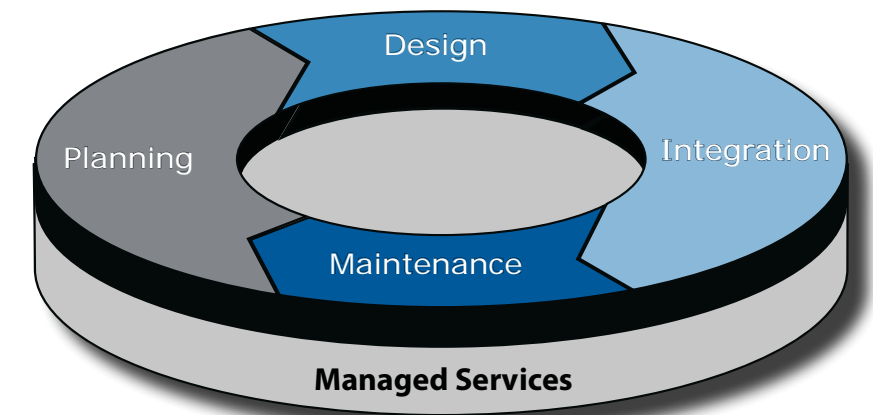

Planning & Design Services

For over four decades, the VISLINK group of companies, and its partnership network, has been providing complete mining and natural resources and secure communications solutions throughout the world.

Whether your planning and design requirements include autonomous solutions, shop-to-mine site equipment control and connectivity, centralized operations, remote equipment and control, or communications needs such as point-to-point, point-to-multipoint, backhaul, MESH, WiFi, WiMAX, LTE, network optical fiber, or structured cable solutions, VISLINK Services provides the most appropriate and reliable applications for comprehensive mining and natural resource solutions.

Our professional organization includes experienced and certified engineers, technicians, as well as planning, design, integration, and installation experts compliant to MSHA/OSHA requirements.

System Integration & Support Services

A complete line-up of design-build solutions from an industry leading system integrator. Our goal is to provide our customers with the highest level of professionalism and experience to exceed your design, integration, and ongoing operational management expectations.

Our project management and technical services team is comprised of professional engineers and technicians with diverse technology and solutions backgrounds, and honed skills and experience in the mining and natural resources marketplace. With years of "real world" and worldwide field experience extending throughout the mining and natural resource market spectrum, from open-pit to underground scenarios, you can always expect professional, expertly-trained personnel dedicated to providing solutions to your unique challenges.

A Network of Partners, Success and Experience

At Vislink Services we take an agnostic, solutions-based approach discovering, diagnosing, designing and delivering a comprehensive solution to address our clients' unique challenges and needs. We do this through our network of solid and long-standing partnerships with mining and natural resources marketplace strategic and technology experts such as M3 Technology Solutions, Rajant, Motorola and others. Together, our network partnership has delivered successful solutions to Mosaic, Kinross, Rio Tinto and other leading companies in the worldwide mining, oil & gas and natural resources marketplace.
